

Sample Group Report

Group Report

This report is generated based on the data of 37 people from your organization who have completed the simulation.

The information in this document is confidential and can be used only by the organization to which the results pertain. It may not be reproduced in whole, or in part, nor may any of the information contained therein be disclosed without the prior consent of the authorized representatives of "KNOLSKAPE Solutions Pte. Ltd." ('the Company'), except within the organization. A recipient may not solicit, directly or indirectly (whether through an agent or otherwise) the participation of another institution or person without the prior approval of the authorized representatives of the Company. No representation, warranty or undertaking, expressed or implied is or will be made or given and no responsibility or liability is or will be accepted by the Company or by any of its directors, employees or advisors in relation to the accuracy or completeness of this document or any other written or oral information made available in connection with the Company. Any form of reproduction, dissemination, copying, disclosure, modification, distribution and or publication of this material is strictly prohibited.

iLead, a compelling real-life like simulation, enables you to understand your approach to people leadership. In the simulation, you played the role of a Team Lead, working with a diverse team of 10 members, to meet the targets set for your team. Your objective was to enable your team to perform well by helping them build their skills, and to increase their motivation and engagement.

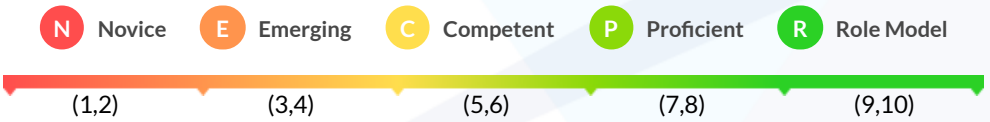

About Report

- This report shows information represented in tables and graphs about the performance of the group of participants from this organization. This information pertains to different parameters which the simulation is built around.
- Wherever it is relevant, the report shows comparisons between the group from the organization and the benchmark. The benchmark represents the industry average of all the people who have played this simulation so far.
- To gain most from this report, consistently look for insights. Ruminating on the possible causes for the group's performance will help.
- The last page provides key takeaways, which is based on what the group has done across each of the parameters. Analyses and discussions around these takeaways with different stakeholders will benefit the organization.

In this section, we can see how proficient the group is, in each of the competencies. The scale shows two scores: the 'Group' is on the top and the 'Benchmark' is on the bottom.

Group: This represents the average of all the people in your organization who have played the simulation.

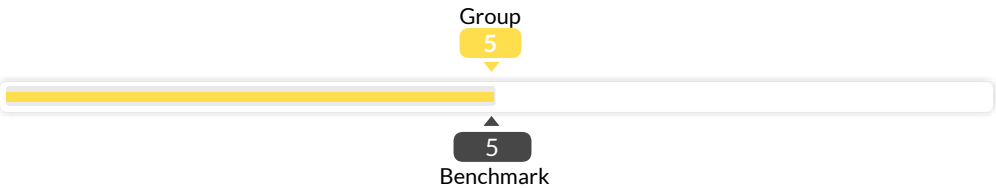

Benchmark: This represents the average of all the people who have played this simulation so far.

Drive For Results COMPETENT

Ensuring goal achievement by managing team members effectively.

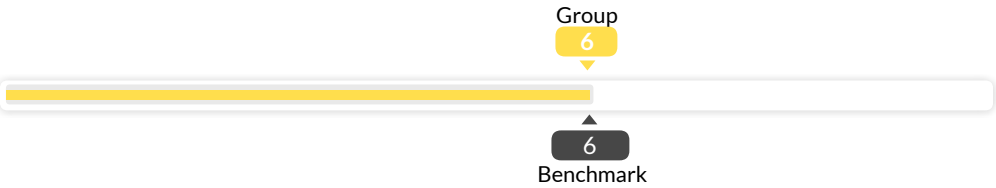

The group is focused on the end goal. Some of the efforts taken to leverage team members competencies were effective. Sufficient number of actions to keep the team enthused were taken, of which only some worked. The group will need to analyze those actions that worked and replicate them for more success.

Ability To Upskill COMPETENT

Identifying and honing team members' skills to accomplish goals.

The group's efforts to identify the abilities of the team members were somewhat successful. The group will need to deepen knowledge of team members' abilities to ensure that all the actions taken to hone skills yield the desired results.

Ability To Motivate **COMPETENT**

Inspiring, energizing and empowering team members to maximize performance.

The group demonstrated a reasonable understanding of team members' needs. Actions taken to maximize enthusiasm, energy, and performance were effective most of the time. Analyses and replication of effective actions will contribute to success.

Group

5

5

Benchmark

Enabling Performance **COMPETENT**

Knowing the right environment that produces superlative performance and creating it.

The group showed an adequate understanding of what team members required in order to perform at a high level. Efforts to create an environment conducive to enhanced performance were somewhat effective. The group will need to deepen their understanding of team members' requirements and analyze successful and failed efforts in order to learn from it.

Group

5

5

Benchmark

Contextual Leadership **COMPETENT**

Dynamically adapting leadership approach to maximize morale, skill & performance.

The group could adequately identify how team members need to be managed at a given point of time and were effective in improving morale, skills and performance dynamically. They can increase their ability to identify team members' preferences through different conversations and feedback mechanisms.

Group

6

6

Benchmark

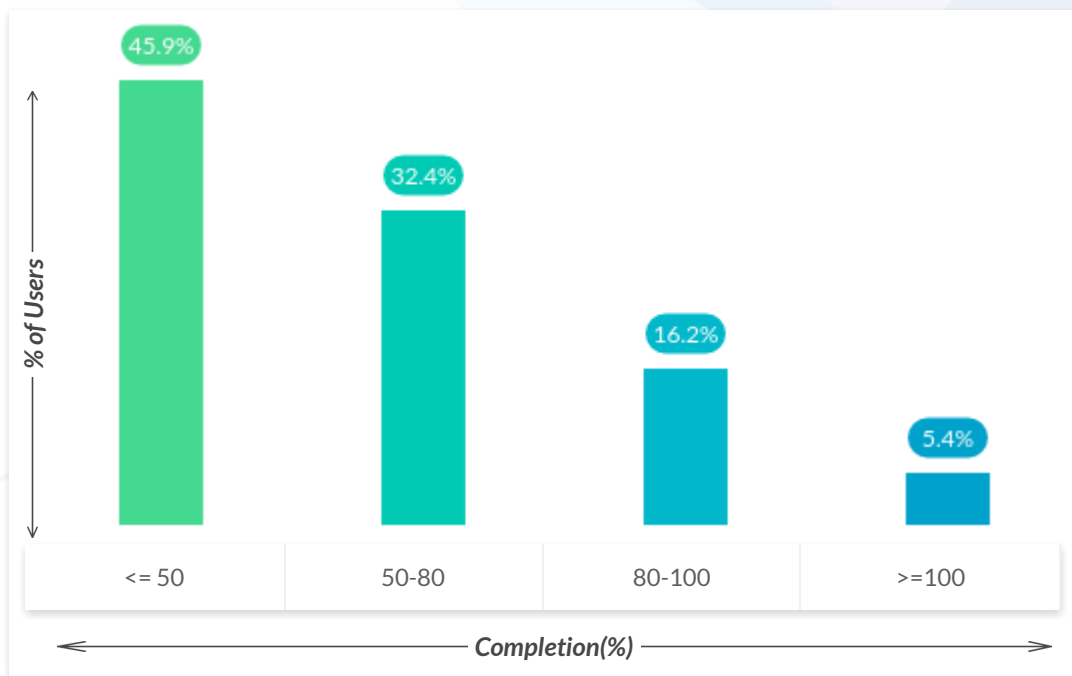

In this section, we can see what percentage of the group are at each proficiency levels for each competency.

All the values mentioned below are in **percentages(%)**.

Take note of the percentage distribution in each competency. Is there a particular proficiency level across competencies which has the highest or the lowest percentage? Is there a competency where there's a concentration in the lower or higher proficiency levels? Is there more than one competency? Does this in any way reflect the organizational culture? Or is there any other reason for this?

In this section, we can see information about the people in the group who completed the simulation in its entirety and those who completed it partially.

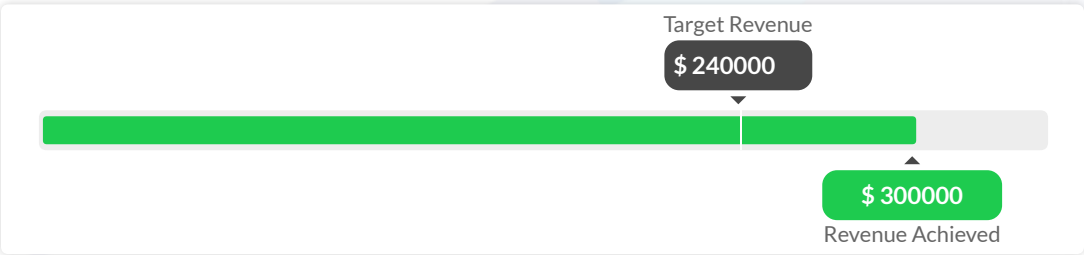

The graph above shows the distribution of number of group members across the different rates of completion.

In this section, we can see the information about the business achievement of the group, which are represented in conversions and revenues.

- Conversions:** This parameter gives information about the leads that have been turned into business.
- Revenue:** This parameter gives information about the value of the converted business against a target revenue number.

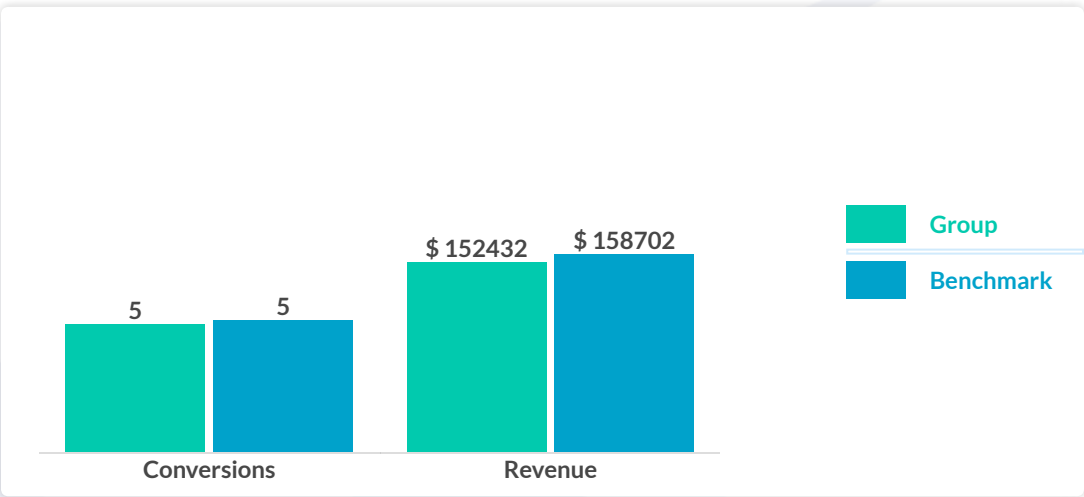

Maximum Revenue Achieved

In the scale below the target revenue as well as the maximum revenue achieved are represented.

Average Conversion and Revenue Graph

The first part of the graph shows the average conversions made by the group and the benchmark for it. The second part of the graph shows the average revenue achieved by the group as well as the benchmark.

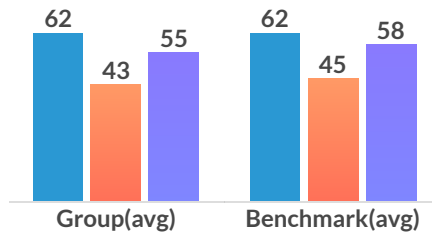

Over-Achievers

This shows the number of people in the group who achieved more revenue than the target.

5%

Skill, Morale, Performance Level

In this graph, the skill, morale and performance levels of the group and benchmark are represented.

Skill

Morale

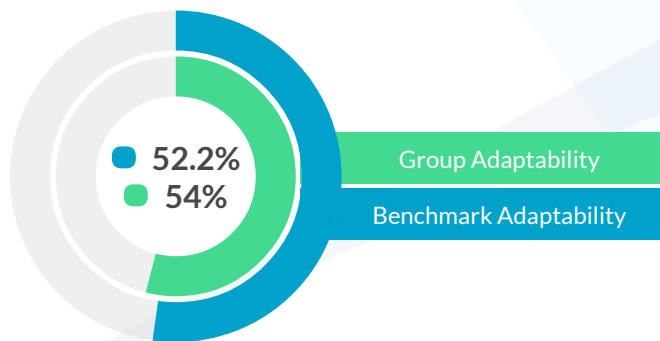

Performance

Compare the conversions and revenue achievements as well as the skill, morale, and performance (SMP) levels of group and the benchmark. Check if there's a correlation between the SMP levels and the conversions, revenue achievements of the group and the benchmark

In this section, we will see which of the leadership style was preferred by the group.

Leadership Style Adaptability

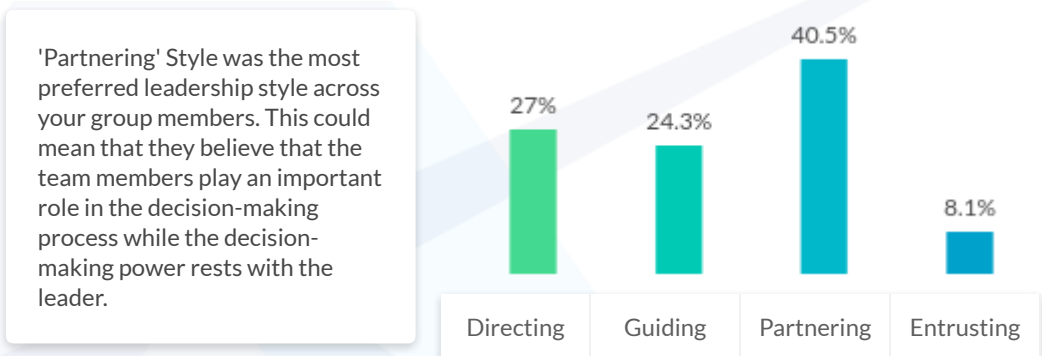

This is a representation of how adaptive the group was while deploying leadership styles.

The ability to read the needs of the team members and getting to know how the team members desired to be managed has the most impact on the accuracy of leadership. Reflect upon the abilities of the group members and see what initiatives need to be taken to improve.

Leadership Styles Preferences

This graph shows the preferred leadership styles of your group members.

In this section, we will see the different leadership styles represented on a skill-morale grid and how the group chose to deploy each of these styles.

Proportion: This represents how much of the time a particular leadership style was used by the group as a percentage.

Accuracy: This shows how accurately the chosen leadership style was deployed. It is represented as a percentage.

High Skill**Partnering** (Proportion: 30.1%)

'Partnering' Style is when the team members play an important role in the decision-making process. The decision-making power rests with the leader. Best deployed when skill is high but morale is low.

Accuracy  55.6%

The group involved the team in the decision-making process as often as or more than the team would have liked. The group was also very effective in deploying this approach. The group will need to consistently do the same to maximize the positive impact on team morale.

Entrusting (Proportion: 18.5%)

'Entrusting' Style is when the process and responsibility passes on to the team member. The leader stays involved to monitor progress.

Accuracy  62.9%

The group has seized the opportunities to hand over more responsibilities to the team, thereby deploying the 'Entrusting' style of leadership well. The group was also very effective in deploying this style of leadership. Continue this approach to maximize morale and skill in the team.

Low Morale**High Morale****Directing** (Proportion: 26.3%)

'Directing' Style is when the leader gives detailed instructions on what his/her team members are expected to do and how to perform the expected tasks.

Accuracy  49.3%

While the group did give directions and instructions to the team, it was not as often as they needed it. However, the group was quite effective in deploying the 'Directing' style of leadership. If they could deploy it more often, they can increase the desired impact.

Guiding (Proportion: 25.1%)

'Guiding' Style is when the leader uses two-way communication and provides support to generate buy-in to the process.

Accuracy  45.5%

The group used the 'Guiding' style of leadership as much as or more often than the team members needed it. However, the group deployed the 'Guiding' style of leadership in a moderately effective way. The group should deploy the 'Guiding' style of leadership more often, for better impact.

Low Skill

In this section, we will see how consistent was the identification, intention and actual deployment of the most appropriate leadership style. The actions: Meet the Team, Meet Face to Face, Set Goals, Coach Member and Give Feedback are considered for the measures in this section.

Desired Style: Predominant leadership approach desired by each team member basis her/his skill and morale levels.

Intended Style: Predominant leadership approach the group intended to take for each team member.

Actual Style: Predominant leadership approach the group actually adopted for each team member. This is the leadership style that was most often used through the different actions.

Desired vs Actual

This shows the deviation between the leadership style that the team members wanted to be deployed and the one that the group actually deployed.

The deviation was not so high between the desired and the actual approaches. This means that the group has somewhat understood the needs of the team members.

Intent vs Actual

This shows the deviation between the leadership style that the group intended to deploy and the one which they actually deployed.

The deviation was not so high between the intended and the actual approaches. The group has a moderately deep understanding of the actions and were somewhat accurate in deploying them.

Desired vs Intent

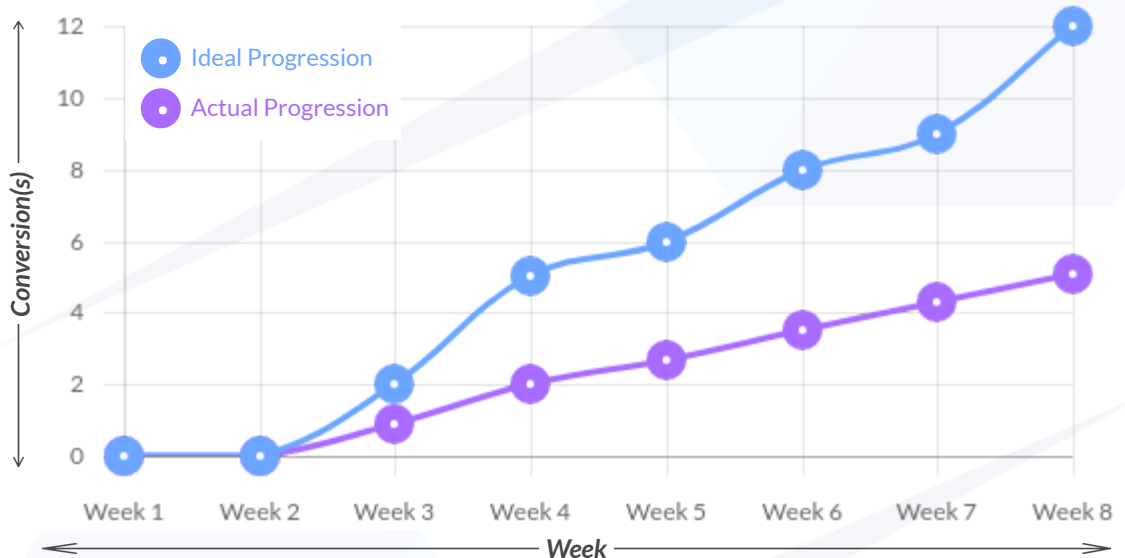

This shows the deviation between the leadership style that the team members wanted to be deployed and the one which the group intended to deploy.

The deviation was quite low between the desired and the intended approaches. The group has a good grasp of the effects of the different leadership styles on team members' skill and morale levels. The group has also understood the team members' needs through studying their skill and morale levels.

In this section, we will see the actual progression of the sales effort by the group, as compared to a maximum that is possible.

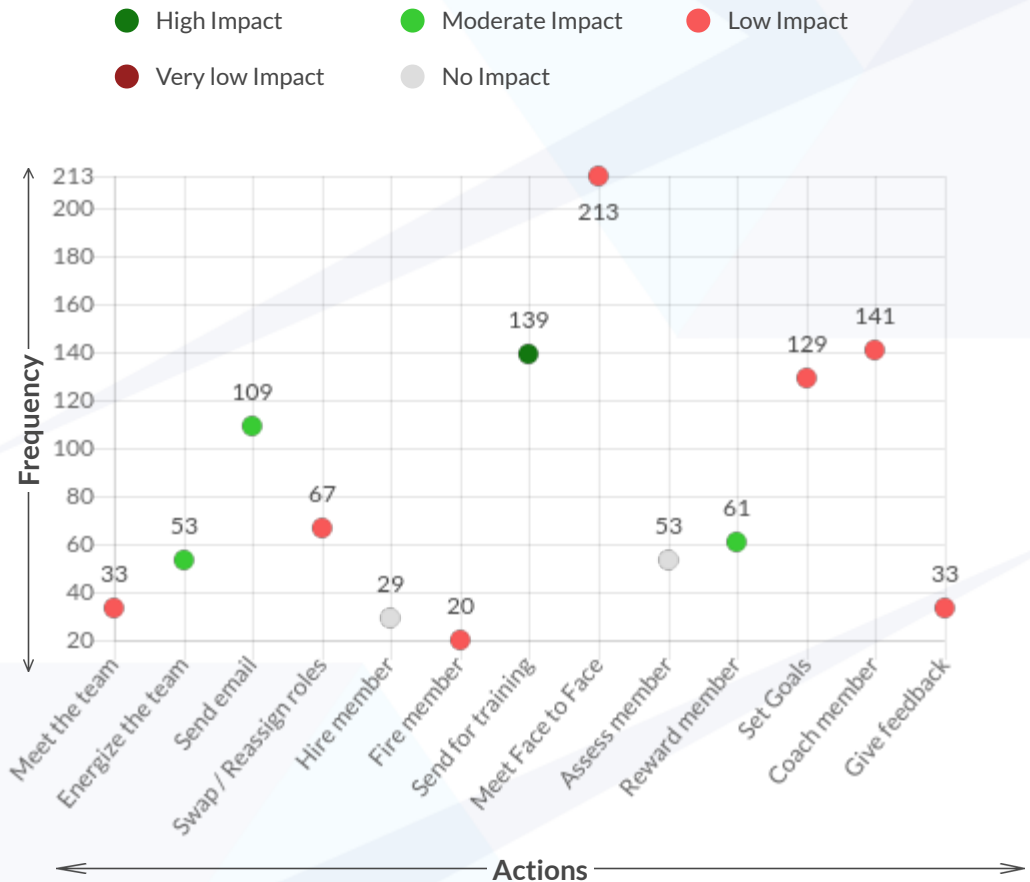

Ideal Progression: This is the maximum possible value that can be achieved week on week.

Actual Progression: This is the week on week progression of the sales effort of the group

- It will give an idea of how the group has progressed week on week in the sales effort. Comparing the two lines will give you an idea of what could have been done to improve the progression.
- Analyze the progress to understand how the group has learnt from doing various actions to drive results.
- Analyze the gap between the 2 lines to study how the group has utilized opportunities to achieve the goal as against what could be possible.
- The ability to learn and apply what has been learnt can be seen in the upward trend of the line as the weeks progressed.
- You should also note at what point of time and how close to the end did most number of conversions happen. This will give an indication of how the team learnt from their actions and successfully achieved their goals.

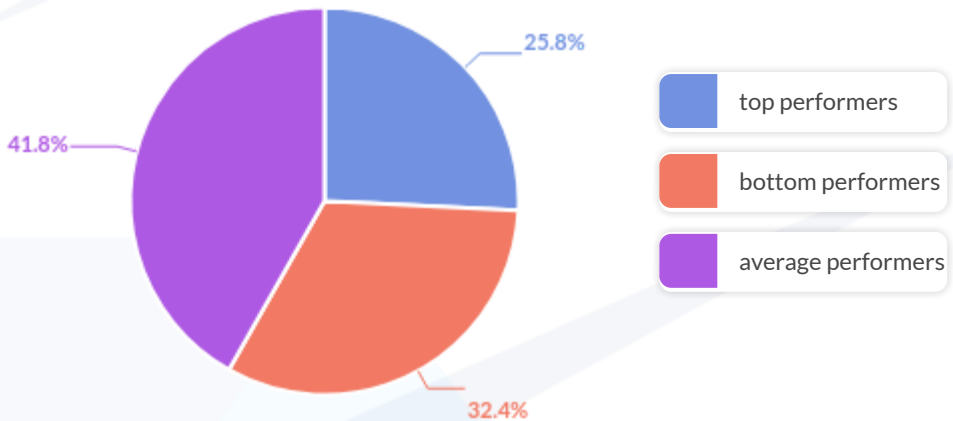

In this section, we will see the different actions taken by the group to achieve targets and their impact on the skill, morale and performance and hence result achievement.

- > Observe in the graph, how frequently each action was taken and what kind of impact it had. Reflect on why some actions were taken often, while some others were not.
- > You could bucket the actions into the different groups and add them up. This will give you insight into whether the group has a preferred way of driving results - upskilling, improving morale or providing leadership.
- > Reflect on how the actions taken have impacted Skill, Morale & Performance levels.

In this section, we will see the time that the group spent with top, average and bottom performers.

- **Top performers:** A top performer is a team member who has been in the top three in terms of performance.
- **Bottom performers:** A bottom performer is a team member who has been in the bottom three in terms of performance.
- **Average performers:** An average performer is a team member who is someone who is neither a top nor a bottom performer.

- > Take note of how the group spent their time - with top, average or bottom performers.
- > Think about whether this is a reflection of the organizational or team culture.
- > Link this with the results achieved and reflect how time spent with team members impacts conversions and business achievement.

In this section, we will consider some key takeaways for you to reflect and analyze. Initiatives to be implemented in your organization can stem from these analyses.

Reflect upon these section-wise questions to gain more insights about underlying phenomena that could affect goal and result achievement in your organization.

Competencies

- What are the organizational causes for certain competencies being well demonstrated in comparison to others?
- Does your organizational culture help you develop your areas of improvement?

Leadership Approach

- What clue does the group's preferred leadership approach give about organizational culture or management style?
- What are the articulated messages and assumptions about people management that are percolating through different levels of your organization? What are the assumptions that your managers make about people management?
- Is this preferred leadership style pointing to a sub-culture within the organizational culture of may be a function, leader or location?

Sales Funnel

- Is your organization able to fully utilize all the tools available for driving results?
- Are there processes in place for learning to happen continuously and on the job?
- Is learning being applied to course correct and drive results?
- Are all opportunities to achieve results being fully explored and utilized?
- Are upskilling and motivational tools available in the organization being fully utilized by the employees to drive results?

Leadership Styles

- Are there processes and mechanisms for getting to completely and continuously know team members and to upskill and motivate them in a way that they resonate with?
- Are there processes in place for studying the impact of measures taken to upskill and motivate employees?
- Are the right kind of leadership approaches being deployed in order to drive results?
- Are employees managing their team members mindfully and consciously?

Actions to drive results

- Does your organization focus more on improving skills and moving them up the ladder?
- Does your organization prefer to build morale and push people to succeed through this approach?
- Does your organization prefer to inspire and lead people to success?
- Do the efforts and approaches the group takes to manage people get the results that are needed?

Management style

- Does your organization believe in nurturing bottom performers, increase their skill and morale and set them up for success? Or does it encourage working with top performers and push them to achieve even more?

About KNOLSKAPE

KNOLSKAPE is an end-to-end learning and assessment platform for “accelerated employee development”. Our unique approach to learning combines the best of new-age, experiential technologies with world-class content, contextualization and robust analytics to deliver stellar learner experiences and develop high potential talent for exponential business growth.

Change Quest

[Try Demo](#)

The ChangeQuest Simulation helps learners be change agents within the organization by enhancing their influencing and communications skills.

Build Your Business

[Try Demo](#)

The Build Your Business Simulation helps learners develop a strategic understanding of business and an entrepreneurial spirit to lead exponential organizational growth.

Trust

[Try Demo](#)

The Trust Simulation develops learners ability to build trust, influence stakeholders and gather customer loyalty for unparalleled customer centricity.

Inbox

[Try Demo](#)

The Inbox simulation helps learners develop execution excellence in managing daily activities by organizing, prioritizing, delegating and fulfilling tasks proactively.

Coaching
