About iLead

iLead, a compelling real-life like simulation, enables you to understand your approach to people leadership. In the simulation, you played the role of a Team Lead, working with a diverse team of 10 members, to meet the targets set for your team. Your objective was to enable your team to perform well by helping them build their skills, and to increase their motivation and engagement.

About Report

- This report tells you about how you performed in the simulation, on various parameters.
- There are several sections in which the information is represented in graphs and figures.
- To benefit from this report, relate the results to the decisions you took in the simulation.
- The Summary section provides you with questions that you should introspect and answer for yourself.
- It also provides with some thoughts for you to keep as a guide when you manage your team.

Competencies

This section describes various competencies that you demonstrated in the simulation.

Competency Score: This score represents your performance in each competency measured on a scale of 1-10.

N Novice

E Emerging

C Competent

P Proficient

R Role Model

(1,2)

(3,4)

(5,6)

(7,8)

(9,10)

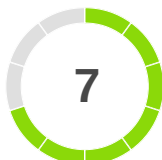

Ability to Upskill

PROFICIENT

Identify, hone and leverage team members' skills to accomplish goals.

You were familiar with your team members' abilities, and you used the knowledge to drive results effectively. All the actions that you took to hone their skills yielded the desired results.

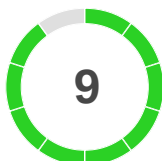

Ability to Motivate

PROFICIENT

Enthuse, energize and empower team members to maximise performance.

You understood your team members' needs quite well. The actions that you took to maximize their enthusiasm and performance were effective.

Enabling Performance

ROLE MODEL

Know and create the right kind of environment that produces excellent performance.

You showed a deep understanding of what your team members require to perform at high levels. You succeeded in creating an environment conducive to high performance.

Contextual Leadership

COMPETENT

Adapt the leadership style dynamically to maximize morale, skill & performance.

You showed adequate ability to read your team members' needs and dynamically adapted your leadership style to improve their morale, skills, and performance.

Drive for Results

ROLE MODEL

Ensure goal achievement through effective management of team members.

Your strong goal-orientation rubbed off on your team members. Your team was delighted with the way you set them up for success. Your response to the diverse situations and your timely guidance to your team members ensured that you surpassed your goal.

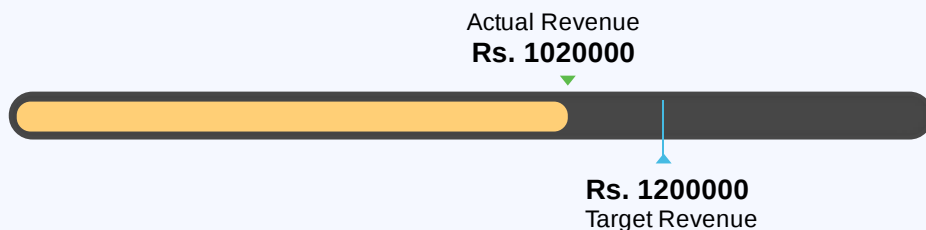

Morale and skill are the two factors that impact performance directly. Adapting one's leadership style, by accurately reading what the team members need and what the situation demands, can enhance performance. High performance drives results.

Objectives

Well done! Though the target was not achieved on time, you led your team reasonably well. You leveraged your team members' abilities well, and you were reasonably adaptable in managing them in different situations.

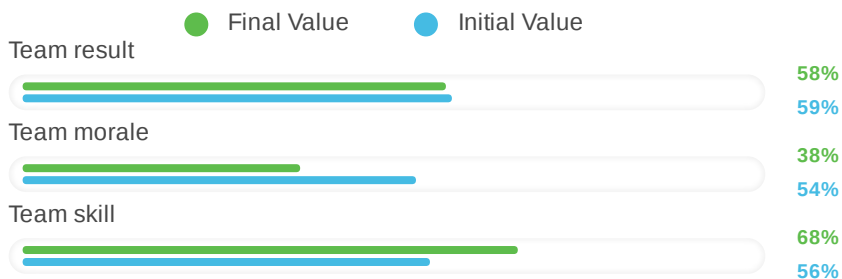

Revenue is calculated based on the number of conversions made

No. of Conversions:

34

This section depicts the revenue achieved by you in the simulation in comparison to the target set at the beginning.

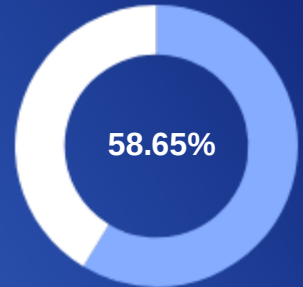

This graph depicts the difference between your team's (overall) skill, morale and result values, in the beginning, and at the end of the simulation.

Overall Leadership Adaptability

The way a leader manages team members in different situations impacts their skill and morale, and eventually, the results. If the leader has consistently chosen the right style to manage a team member, it will result in increased skill and morale, and hence, better results. On the other hand, if the leader has consistently chosen inappropriate styles, it will result in decreased skill and morale, and thus, lower results.

- > You demonstrated high levels of leadership adaptability
- > You adopted the correct leadership styles most often, and were able to change it as the situation demanded, based on the accurate reading of your team members' needs

Leadership Styles Summary

In the simulation, you adopted different styles in leading your team across various scenarios. The extent to which you adopted these different styles and their effectiveness is described below:

Proportion: The proportion of use of a style as compared to other styles (out of 100%).

Accuracy: This shows how accurately the chosen leadership style was deployed, and is represented as a percentage of 100%.

High Skill

Partnering (Proportion: 31%)

'Partnering' Style is when the team members play an important role in the decision-making process. The decision-making power rests with the leader. Best deployed when skill is high but morale is low.

Accuracy  59%

You often encouraged and involved team members in the decision-making process. However, your score indicates that they would like to be involved more often than you think necessary. To make a real impact, employ this style more often.

Entrusting (Proportion: 16%)

'Entrusting' Style is when the process and responsibility passes on to the team member. The leader stays involved to monitor progress.

Accuracy  81%

You used the 'Entrusting' style to a sufficient extent. You demonstrated a high degree of adaptability and were hands-off with those team members who really enjoy working independently.

Low Morale

Directing (Proportion: 16%)

'Directing' Style is when the leader gives detailed instructions on what his/her team members are expected to do and how to perform the expected tasks.

Accuracy  37%

You did employ the 'Directing' style of leadership with your team from time to time. Your score indicates that some of your team members need it more often than you think necessary. To make a real impact, employ this style more often with those that need it and avoid it with the team members who don't desire this style of leadership.

High Morale

Guiding (Proportion: 37%)

'Guiding' Style is when the leader uses two-way communication and provides support to generate buy-in to the process.

Accuracy  76%

You used the 'Guiding' style to a sufficient extent. You not only demonstrated a high degree of adaptability in guiding those team members who would really benefit from it, but you also did so just when they needed it.

Low Skill

In most situations, while leading your team, you used the **Guiding** style of leadership. This is your preferred Leadership Style.

Consistency in Styles

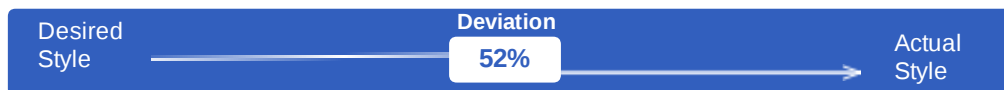

In this section, we will see how consistent was the identification, intention and actual deployment of the most appropriate leadership style. The actions: Meet the Team, Meet Face to Face, Set Goals, Coach Member and Give Feedback are considered for the measures in this section.

Desired Style: Predominant leadership approach desired by each team member based on their skill and morale levels.

Intended Style: Predominant leadership approach you intended to take for each team member.

Actual Style: Predominant leadership approach you actually adopted for each team member. This is the leadership style that was most often used through different actions.

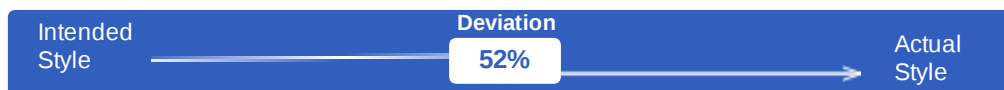

Desired vs Actual

This shows the deviation between the leadership style that the team members wanted to be deployed and the style that you actually deployed.

When you chose your actions to engage with your team member, you seem to have some knowledge about how it impacts the team members' skill and morale. You will have to do a deeper analysis to have a greater positive impact.

Intent vs Actual

This shows the deviation between the leadership style that you intended to deploy and that which you actually deployed.

While there was some alignment in the leadership style that you intended to take and the actions that you took to implement it, you will need to take more effort to align the two.

Desired vs Intent

This shows the deviation between the leadership style that the team members desired and that which you intended to deploy.

You have understood your team members' skill and morale level, and you have consistently picked the appropriate leadership style.

Summary of Actions

You took various actions while deploying the different leadership styles in the simulation. The extent to which you used these actions and their effectiveness are described below:

Impact: The extent to which the action you took had a positive outcome.

Frequency: The number of occasions on which you took the action in the simulation.

Meet the team

Team meetings help promote teamwork, brainstorm ideas, take collective decisions, share updates and inspire your team members. It's important to strategically plan and time your meetings to impact the entire team positively.

You need to make a conscious effort to strategically plan and time your meetings, as they impact your team members' skill and morale. Your scores indicate that the impact was not positive. Align your actions to your team members' needs better.

Impact Frequency

Low

1

Energize the team

Energizing the team through team activities and motivational messages is an effective way of engaging the team and boosting morale.

Your attempts to energize the team had a positive impact on the morale of the team members. Introspect on what you did well, and do it more often to increase their morale even further.

Impact Frequency

Moderate

4

Send email

Sending an email is a powerful way of engaging with your team. When you adopt the right style this could be a personalized and effective way of sending key messages, improving skill, increasing morale and opening a two-way communication channel.

You have not sent any emails to your team. You should leverage this very effective tool by sending well-thought out emails periodically to reinforce key messages as well as to hear what your team members have to say

Impact Frequency

No

0

Summary of Actions

Send for training

Formal and structured learning opportunities can be a powerful way of developing your team members' skill, and performance while conveying your commitment to their professional development. You will, however, need to align the learning need and the program.

Your attempts to train your team members had a somewhat positive impact on their morale, skill, and performance. For a higher impact, you will have to get an in-depth understanding of their learning needs before you recommend them for learning programs.

Impact Frequency

Moderate

6

Meet Face to Face

If handled in a manner that meets the team member's needs, having a personal, face-to-face discussion periodically can be very effective in building strong relationships and opening communication channels, thereby raising morale and improving skills.

Your approach to a face-to-face meeting was counter-productive and was not effective in building a relationship or opening communication channels. It had a negative impact on morale and skills. You are urged to change your style to suit the needs of your team member.

Impact Frequency

Very Low

4

Assess member

Evaluating the suitability and fitment for a role, before reassigning team members to a new role, is critical to driving results.

You did not use the assessment action. Without this action, reassigning team members becomes ineffective. It is important for team members to work in roles that are aligned to their skills and strengths

Impact Frequency

No

0

Reward member

Rewarding a team member is a powerful way of recognizing performance. It serves to reinforce the right behavior and can be an effective tool to raise their morale.

Your approach to recognizing your team member was effective. It did have a somewhat positive impact on their morale and performance. To maximize the impact, you must select the right team member to be rewarded at the right time.

Impact Frequency

Moderate

2

Summary of Actions

Set Goals

Priorities play a critical role in helping team members focus on what is important for the project, team, and themselves. It is essential to conduct the goal-setting discussion in a manner most appropriate to the team member.

Your attempts to help your team members set priorities yielded low success. You are strongly recommended to understand your team member's needs, and help them set their priorities.

Impact Frequency

Very Low

2

Coach member

Coaching is an effective method of engaging your team members, improving their skills and performance. Choose the right team member and the right style of coaching to have the best effect.

Your attempt to coach your team member had a mildly positive effect on performance. Although the style you took may have worked to some extent, you should make a note of your learnings to improve your style and apply it consistently.

Impact Frequency

Moderate

7

Give feedback

Giving the right feedback at the right time in the right manner can be a powerful tool to increase morale, as well as to bring and keep performance on track.

Your attempt to give feedback had quite a negative impact on your team member's morale and adversely affected his performance.

Impact Frequency

Very Low

2

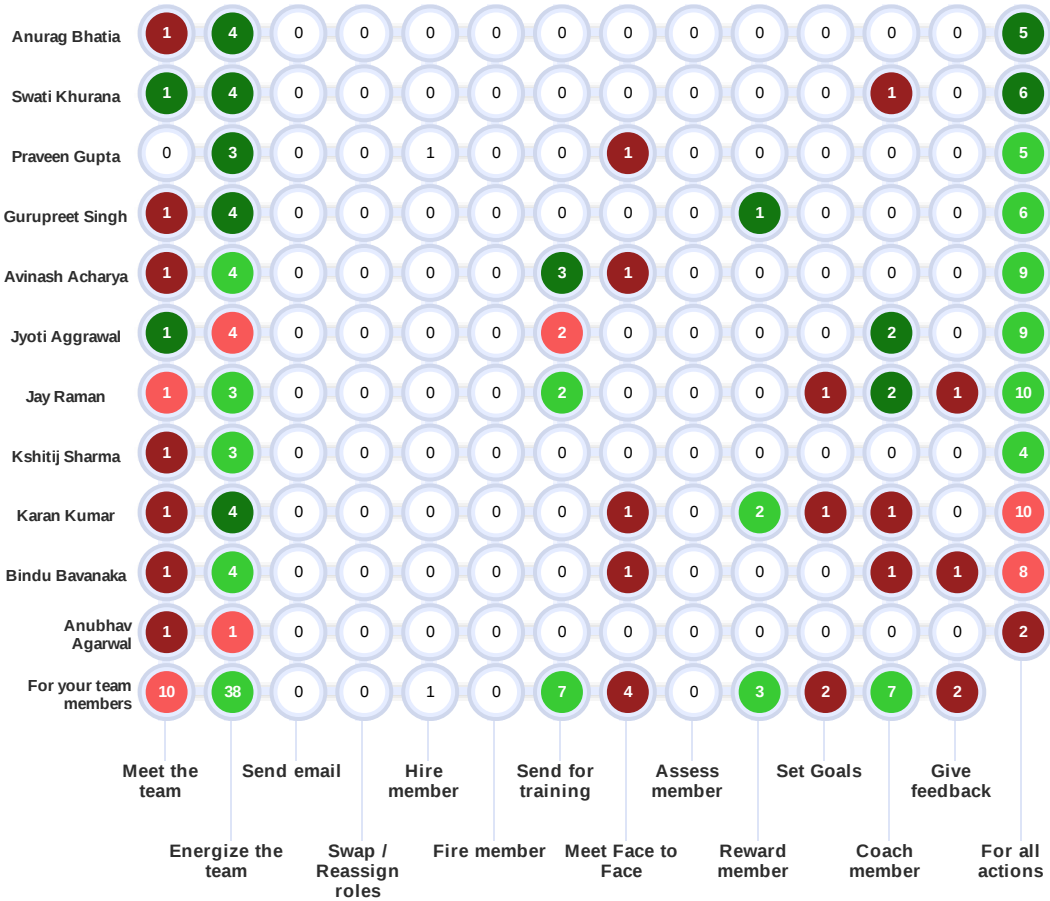

Distribution of Actions across Team Members

As you look at this table, make sure to go through the 'Food for thought' section questions below. This table focuses on two aspects - the numbers and the colors. If more of the boxes have zeros, it indicates that you have not used all the actions that were available to you. On the other hand, if most of the boxes have numbers, it indicates that you have used most of the actions available to you.

- **Number:** The number in each cell indicates the number of times an action had an impact on a team member.
- **Order:** Team members are listed in the descending order, by the impact each of your actions had on them. The most positive being on top and the least on the bottom.
- **Gradient:** The gradient of each cell indicates the impact of each action on the team member's performance.
 - Very low Impact
 - Low Impact
 - Moderate Impact
 - High Impact

Distribution of Actions across Team Members

Food for Thought

Here are some questions that will help you understand your actions better:

- Did you give your attention to and engage with all your team members? If you did not, then why not? Why did some team members get more of your time and attention, while others got less or none at all?

Giving proper attention to and regularly engaging with all your team members is a must for you to drive results.

- Are you unconsciously biased for or against some or any of them?

Biases, even if it is unconscious can be picked up by others and will adversely affect morale.

- What actions did you prefer or were comfortable taking, and why?

The actions that are taken to manage teams may emerge from how you prefer to be managed.

- What kind of actions had what kind of impacts on team members? Why do you think that the same actions had one kind of impact on a team member and an entirely different kind of impact on another team member?

Impact of an action is affected by the situation and mindframe of the team member. Continuously communicating, assessing and adapting is critical to your success in driving results.

Key Takeaways

Thank you for playing the simulation! We hope you had a great experience. As we conclude, here is a summary of key points and recommended next steps.

- The strength of a good manager lies in leveraging his team members to drive results.
- Morale and skill are equally important for good performance. Performance drives results.
- Keep communication channels open and get to know your team members better. This will help you take the right steps to increase morale and performance.
- Continually assess your team members and upskill them as and when needed.
- Give constructive feedback and coach as needed. Appropriate attention results in improved morale.
- Challenge your team members. Motivate, support and celebrate success to enhance and sustain performance.
- Take leadership styles based on your team members' skill and morale levels. Be adaptable to your team members.

About KNOLSKAPE

KNOLSKAPE is an end-to-end learning and assessment platform for “accelerated employee development”. Our unique approach to learning combines the best of new-age, experiential technologies with world-class content, contextualization and robust analytics to deliver stellar learner experiences and develop high potential talent for exponential business growth.

Change Quest
